

Barracuda Spam Firewall:

Winner of numerous industry honors, including Network Computing's Editor's Choice Award and the 2004 and 2005 Well-Connected Awards, our flagship product, the Barracuda Spam Firewall, provides spam and virus protection for over 30,000 customers around the world. Customers include Adaptec, Knight Ridder, CBS, Coinstar, Europcar, Forbes, Georgia Institute of Technology, IBM, NASA, North Carolina Highway Patrol, Pizza Hut, Union Pacific Railroad, and the U.S. Treasury Department.

GENERAL FEATURES

The Barracuda Spam Firewall is an integrated hardware and software solution for complete protection of your email server. It provides a powerful, easy to use, and affordable solution to eliminating spam and virus from your organization by providing the following protection:

- **Anti-spam**
- **Anti-virus**
- **Anti-spoofing**
- **Anti-phishing**
- **Anti-spyware (Attachments)**
- **Denial of Service**

POWERFUL & COMPLETE SOLUTION

The Barracuda Spam Firewall is compatible with all email servers and can fit into nearly any corporate or small business environment. It is used by small organizations with as few as 10 employees and large organizations with as many as 200,000 employees. A single Barracuda Spam Firewall handles up to 25,000 active email users and 15 million email messages per day. Multiple units can be clustered together for even greater capacity and high availability.

The Barracuda Spam Firewall protects your email server with ten defense layers:

- Denial of service and security protection
- IP block list
- Rate control
- Virus check with archive decompression
- Barracuda virus check
- User-specified rules
- Spam fingerprint check
- Intention analysis
- Bayesian analysis
- Rule-based scoring

Barracuda Spam Firewall Defense Layers

The Barracuda Spam Firewall architecture optimizes the processing of each email to maximize performance and process millions of messages per day. Unlike software solutions, the Barracuda Spam Firewall reduces the load placed on the email server by off-loading both spam and virus filtering.

In addition, all Barracuda Spam Firewall models include essential outbound filtering techniques including attachment scanning, virus filtering, rate controls and encryption. These features help organizations to ensure that all outgoing email is legitimate and virus-free.
