

## Corporate Fact Sheet

Thobson Group ([www.thobson.com](http://www.thobson.com)) is an industry-leading provider of infrastructure, Websites, Hosting, Data Entry Solutions and hosted software applications to small and medium businesses around the world. With world-class infrastructure, Thobson offers full-service Web Development and Web hosting services, including managed dedicated hosting solutions and a broad range of e-commerce, application hosting, and connectivity solutions and 3D Modelling and Architectural Drawing too.

Thobson offers multi-platform Solutions with the advanced security, customer-empowering control panels, expert support, reliability, and high-bandwidth necessary to exceed the mission-critical business needs of customers worldwide. With a world-class network infrastructure that includes data centers, Thobson manages more than 20,000 hosted Web sites and more than 16,000 customer accounts.

## Vision Statement

The very nature of computing is changing, with the real power center moving from the desktop to the network. This move will provide the biggest advantage to small and medium businesses, who will be first to embrace this new model of outsourced infrastructure and hosted software applications. Hosting will be the foundation for this "third wave" of computing.

## Mission Statement

Thobson will be the global leader in providing world-class infrastructure, Website and hosted software applications to the small and medium business market. The opportunity is huge and we are playing to win.
